SBLi® Scenario Planning: Template 1 (written description)

Please Note: This template is not a prescriptive instruction on how to develop a SBLi. Please adapt this template to develop resources in your particular subject of interest.

Scenario Descriptor	Scenario Details	Example
Name of Scenario		*Doug's Apple Problem*
Role of student		*Horticultural consultant*
Brief story or background to the scenario		*Students will visit an orchard and assess a plant problem, discuss the problem with the grower and take back infected plant samples to analyse in the laboratory.*
Objectives tested/demonstrated		*Determine the problem* *Justify their reasoning* *Recommend an action*
Educational objective/s		*Demonstrate the process of diagnosis and to show students how knowledge is used in a real-life situation*
Course and placement		*Embedded in AG ####. It will be used as an exploratory learning experience before the series of lectures on plant diagnosis.*
Assessment		*No formal assessment. Questions will be included in the scenario to provide the students with an opportunity for reflection.*
Model Answer		*Included at the end of the scenario*
Delivery format		*As a 2hour session in a computer lab as part of tutorial process. Demonstrator will be present to assist.*
Team/individual		*At student's discretion.*
Remote access		*Not necessary but will be available through Blackboard*
